Abstract

In this paper are described studies of the team of Prof. Momtchil Dobrev and Prof. Mariola Garibova proving the truth about depression as a mental disorder based on THEORY of ENERGY-INFORMATION PSYCHUATRY and THEORY OF THE UNIVERSUM developed by Prof. Mariola Gariova and Prof. Lord Momtchil Döbrev - Halachev in the Year 2005, Basics of the Cosmological Theory of Information and Vortex Field Theory developed by Lord Prof. Momtchil Döbrev - basic structure of the unionvrsum ”

Keywords: Depresses, Theory Of Energy-Information Psychiatry, Theory Of Universum

1 | INTRODUCTION

The explanation of this as depressions as a mental disorder from the point of view of the energy of the human being gives a complete picture of these diseases. It is high time for the human body to be seen as an energy system and not only to explain the human illnesses from this point of view, but it will also give specific methods of treating the diseases that traditional medicine has not yet given.

Explaining the depressions from the point of view of the energy of the human being gives a complete picture and clarifies not only the nature of these diseases, but also provides ways for their better treat-

ment.

1991 Lord Prof. Dr. Momtchil Dobrev creates his theory of vortex fields and Cosmological information

Supplementary information The online version of this article (<https://doi.org/10.52845/CMRO/2022/5-1-1>) contains supplementary material, which is available to authorized users.

theory. The explanation of how information and energy is transmitted on what paths, based on Momchil Dobrev's theory of vortex fields and cosmological information theory, is a new reading and proof of what the tree of life is painted and painted by ancient 3000 to 12000 BC.

Stepping on his theories Lord Prof. Dr. Momchil Dobrev, with the help of Prof. Mariola Garibova, 2005 they both developed the "Theory of Universum" and "Theory of Energy-information Medicine, Energy-information genetics, Energy-information psychology and Energy-information psychiatry" and related equipment and made research based on the fact that the chakras of the person who is the energy center are double whirlwinds that work in a specific way.

The results are undisputed and prove a new jade of medicine in the treatment of human diseases - both physically and mentally - holistically - based on the energy of the human being.

2 | DEPRESSION - TYPES, SYMPTOMS, SIGNS, SOCIAL PROBLEMS, PHYSICAL PROBLEMS – SHORT LY

One of the areas that Mariola Garibova-Dobrev and Momchil Dobrev with his team of researchers was and is psychology and psychiatry - respectively depression and its types. So here we will briefly describe the main directions on which the research results are obtained.

Depression is the general happening of a feeling of melancholy, despair, helplessness, stupidity, sadness,

Melancholic Depression

Loss of interest or pleasure from activities that usually deliver joy

Early wake up in the morning

Reduced emotional reactivity in terms of positive stimuli of the environment - lack of emotional response to pleasant experiences

SYMPTOMS of the DEPRESSION – shortly

Some people experience several symptoms. The severity of symptoms of depression varies depending

on physical persons and also varies over time.

SYMPTOMS:

A sense of complete apprehension, hopelessness and meaninglessness of everything.

Persistent sadness and depression

Feeling anxious and helpless

Feeling emptiness

Anger and irritability

Feeling guilty

Loss of confidence

Lack of interest in everyday activities indifference

Lack of motivation "chronic fatigue, lack of energy, lethargy

Difficulties in concentration, memory disturbances

Difficult decision making, passivity

Inability to test pleasure

Fear of the future

Thoughts or suicide attempts

Eating disorders, loss of appetite - weight reduction

Increase in appetite - Weight gain

Sleep disturbance, wheezing / insomnia, early awakening, feeling of fatigue after normal longer sleep /

SOCIAL PROBLEMS

- Insulation,

- Lack of interest in sex and / or lack of sexual desire

- Lack of enjoyment

- Difficulties in the relationship

- Social withdrawal

- Social withdrawal from contact with people

PHYSICAL PROBLEMS

- feeling of physical exhaustion, headache, back pain, stomach pain, pain

RECOGNITION OF CLINICAL DEPRESSION

- Seriously sad, anxious, or "empty" mood

- Feelings of ignorance, pessimism

- Feeling guilty,

- A sense of futility

- Feeling helpless

THE ABOVE RESULTS SHOW THAT ONLY A COMPLETE AND COMPLEMEN

- Loss of interest or pleasure from hobby, action,
- Reduced energy
- Fatigue
- Difficulty concentrating, remembering, making decisions
- Insomnia
- Early co-awakening
- Appetite
- Think of death
- Think of suicide
- Suicide attempts
- Feeling anxious "Feeling irritable

- Loss of interest or pleasure from favorite hobbies and activities, including sex
- Reduced energy, fatigue
- Difficult concentration, difficult decision-making
- Insomnia, waking up early in the morning
- Lack of appetite and weight loss, systemic overeating and filling
- "Mills for death, real attempts to kill
- Anxiety and irritability
- Feeling hopeless and helpless
- Low self-esteem
- Continuous guilt or futility
- Loss of motivation
- Indifference

3 | RESEARCH OF THE DEPRESSION FROM PROF. MARIOLA GARIBOVA AND PROF. MOMCHIL DOBREV BASED ON THEIR THEORY OF ENERGY-INFORMATION PSYCHIATRY, ENERGY-INFORMATION GENETICS, ENERGY-INFORMATION MEDICINE, ENERGY INFORMATION PSYCHOLOGY, THEORY OF UNIVERSE, COSMOLOGICAL THEORY OF INFORMATION AND THEORY OF SWIRL FIELDS

On the basis of the Cosmological Theory of Information and Theory of the Viper Fields of Momchil Dobrev, both Momchil Dobrev and Mariola Garbova develop :Theory of Energy-information psychiatry, energy-information genetics, energy-information medicine, energy information psychology: and :Theory of the Universe" as part of this theory:

- "energy-information genetics",
- "energy-information psychology"
- "Energy-Information Psychiatry"

SIGNS FOR CLINICAL DEPARTMENT

- Still sad, trembling, gloomy and "festive"
- Feeling guilty

3.1 | RESEARCHES of Prof. Momchil Dobrev, Prof. Mariola Garibova and Alexander Garibov with equipment from the Dobrev-Halachev Scientific Research Institute - created by Prof. Momchil Dobrev

More than 47 studies have been carried out on people with depressions with scanning apparatus, a device that scans the patient's energy system, and takes into account the energy of each of the seven main chakras, the auratic fields of the patia, where and what kind of energy - what color of energy .

The apparatus shall account for:

- blockages of the respective chakras - level, degree, blocking force,
- where the blocking from the front or back comes from,
- direction of blocking - from inside out or from inside out
- energy threads included in both the mind and the subconscious level.
- Chakra color, change, color,
- Turn on another color of energy in the chakra -
- Turn on another power source

- Degree of switching from an external source from an external source behind the chakras
- Color of switching on a new power source in the chakra.
- Include this energy source - field and another chakra.
- Switching color of another source of energy
- Color of energy source at sub-level
- Color of energy source at the level of consciousness
- Energy contamination of the chakra by the patient himself - his consciousness
- Energy contamination of the chakra patient from another source at the level of consciousness
- Energy contamination of the chakra patient from another source at the subconscious level
- Energy contamination n

It is also known that energy bonds connecting the patient's energy field are in front of the chakras, and which ones are behind the chakras.

What energy objects are connected to the patient's energy system.

3.2 | What the research has shown and confirmed in identical cases of patients' disease:

Particular patient results confirmed in patients are similar symptoms.

1). Example - patient with depression - energy connected at the back of the fifth chakra - color of the energy input of the other source at the moment of switching - gray. Result - Patient does not speak to him at the moment of inclusion.

The emergence of a gray energy field at sixth and seventh chakras.

2). Example - patient with suicidal depression - energy-connected at the back of the first chakra - color of the energy input of other source - at the moment of insertion - gray-black. Result - the patient wants to kill himself.

Appearance of a gray energy field at the level of the fourth, fifth, sixth and seventh chakras.

3). Example - a patient with depression - feeling guilty - energy-connected in the front and / or back of a second chakra. In the rear connection - the color of the power switch is gray.

At the front - in the direction of blocking a second chakra from the inside out - the chakra pollution - brown.

At the front - in the direction of blocking a second chakra from the outside to the inside - gray, black - brown.

4). Example - a patient with fearsome psychosis - an energy spiral on the front and / or the back of the first chakra.

5). Continuously sad, jarring, gloomy and "festive" Patient - first and second chakra.

6). Loss of interest or pleasure from favorite hobbies and activities, including sex

7). Reduced energy, fatigue - energized on the fourth front panel chakra

8). Difficult concentration, difficult decision-making - third chakra, fourth chakra, six chakra

9). Insomnia, waking up early in the morning

- Lack of appetite and weight loss, systemic overeating and filling

10). Thoughts of death, real attempts to wipe - blocked first chakra

Appearance of a gray field in the second clock

11). Anxiety and irritability -

12). Feeling sorrow, hopelessness and helplessness - the fourth chakra, the first chakra, the sixth chakra.

13). Low self-confidence - the third chakra and the sixth chakra

14). Continuous guilt or futility - second chakra, third chakra

These are the results that the corresponding patient condition is confirmed by the patients concerned.

**4 | BASICS OF THE ENERGY-
INFORMATION GENETICS, ENERGY-
INFORMATION PSYCHOLOGY,
ENERGY-INFORMATION PSYCHIATRY,
ENERGY-INFORMATION MEDICINE ,
ENERGY-INFORMATION ARCHEOLOGY
BASED ON THE THEORY OF THE
UNIVERSUM DEVELOPED BY PROF.
MARIOLA GARIOVA- DOBREVA AND PROF.
LORD MOMTCHIL DOBREV – HALACHEV IN
THE YEAR 2005,**

The theory of universum , which in turn distinguishes:

- “energy-information medicine “
- ”energy-information genetics”,
- ”energy-information psychology”
- ”energy-Information Psychiatry”
- “energy-information Archeology

On the basis of the Cosmological Information Theory and Vortex Theory Theory, Mariola Garbova and Momchil Dobrev elaborate 2005. Theory of Universum.

We will briefly state that, based on the research of the human energy system and how it affects precisely defined diseases such as the identification system and consequently as a method of therapy and healing, it has been proven that the chakras actually represent the human energy centers double swirls that can rotate both on one side and the other. The interdependence of man’s energy is energetic in the environment at both the conscious and the subconscious level, he has demonstrated the connection of human states, diseases, diseases, to the state of man’s energy system - chakras, energy flows, consciousness, subconscious.

In fact, diseases that have been studied by Mariola Garibova and Momchil Dobrev have found an easy and adequate explanation. This, in turn, not only provides an explanation for the types of illness, but also gives a realistic guide to their therapy holistically - ie. complex - physical and spiritual - ie. energy.

Based on these studies, the following sections of medicine, biology, psychology, genetics,

- ”energy-information genetics”,
- ”energy-information psychology”
- ”Energy-Information Psychiatry”

Since the current article allows for such a voluminous viewing of matter that requires a monograph of at least 1500-2000 pages, we will give the results briefly below.

4.1 | Consciousness and information

Information is the primordial essence that gives birth to everything and everything alive. Information is part of consciousness, which is a living system that stores, receives, renews, sends, manages the processes, movements, actions of life.

Consciousness / through information influences the energy field and accordingly through it on matter.

Consciousness / through information and based on signals from:

- The medium / through food /
- environment / nature, plants, animals /
- the environment / Earth’s energy information field /
- the medium / information energy field of a person
- another person /
- the medium / information - the energy field of the Sun /
- the environment / energy information field of the universe /
- the environment / other people’s energy information fields /
- the environment / from the subconscious - from past lives, past experiences in, present and past experiences from previous lives

Information is influenced and controlled and controlled, commanded accordingly by energy fields, which in turn affect matter.

There is an energy - information matrix / consciousness / on Earth, in the sun, in the universe, in man.

Consciousness is an information field that is different for different types of density, depending on different

dimensions of the field.

Consciousness is an information matrix that corresponds to and is composed of the consciousness of different fields - field structures.

For humans - depending on the fields - information fields have 12 dimensions of consciousness, the basis of which are types of vortex fields. Therefore, the DNA helix is double and counter-clockwise. Reading information from DNA is in that one and only direction.

This is the direction of reading and writing information. Snakes in antiquity show the generation of the power that reads information.

This is the direction of energy generation to maintain vortex fields.

The Twelve - the Six Double Threads Prove the Existence of a 12 Dimensional Dimension - Space - 12 Dimensions of Human DNA.

4.2 | Vibrations, resonance - a method of treatment of diseased organs, structures

Resonance - a method of treating diseased structures and organs.

The importance of vibration for diagnosing the human body and organs and determining the correct diagnosis.

Each cell emits specific vibrations, each organ emits specific vibrations. When an organ is healthy, it emits precisely defined frequencies in the frequency range between 7 and 8 meters. When an organ emits a frequency that is lower than the normal / healthy / frequency or higher than the healthy frequency, that organ is ill.

Separately, every human feeling radiates a precisely defined frequency.

Positive feelings such as joy, peace, love, silence, and others radiate frequencies that are harmonious with frequencies of harmony.

Negative thoughts such as fear, envy, anger, greed, hatred emit specific frequencies.

When one emits such frequencies that are specific to fear, envy, anger, hatred, the total cumulative frequency of the person is lower.

The cumulative frequencies are as follows:

- Lows from 2.7 to 9.7
 - Lows above 9.7 to 26
 - High - more than 28 to 56
 - Senior - more than 56 to 115
 - Highest - more than 115 - up to 205
- Above 265 is the frequency of the next human race.

The "negative vibrations" are the following:

- Fear from 0.2 to 2.2
- Offense - from 0.6 to 3.3
- Outrage - 0.6 to 1.9
- Explosiveness - 0.9
- Rage - 0.5
- Anger - 1.4
- Gordelivostk - 0.8
- Pride - 3.1
- Neglect - 1.3
- Excellence - 1.9
- Pity - 3

The person who possesses positive qualities he emits higher frequencies:

- Thanks - 45
- A heartfelt thank you from 140 upwards
- Harmony with others - 144 and up
- Compassion - from 150 and on a fervent one
- Pity 3
- Generosity - 995
- Acceptance of reality - 46

A person who radiates love to all regardless of their qualities emits a vibration of 150 - up.

Chronic diseases vibrate at specific frequencies.

Love has the highest vibration.

Each cell has a field structure that has a consciousness - an information field.

Information is, is not, is or is being reflected.

Information is the fundamental essence of every manifestation - energy field, matter.

The information determines the internal state of the field, the object, the environmental impact, the received information (signals, etc.) is transformed.

Life is impossible from the surrounding information and energy field of every object.

Without information there is no existence, no development, no life.

The consciousness / information field / of the Earth contains all the information about the Earth;

Human consciousness has a multilayered structure in a hierarchical system; it receives, stores, renews, manages processes, motions, development, every creation.

Vibration frequencies

The vibration of a healthy human body during the day is between 62 and 68 MHz

When this vibration falls, human cells begin to change - to mutate. This is below the 62 MHz frequency.

At 58 MHz, the human body has the flu or cold

When candida is present in the body of a person, the frequency of the ablation is 55 MHz

When cancer occurs in the human body, the frequency is 42 MHz - 46 MHz.

At the onset of the death process, the frequency is measured at 20 MHz.

In the presence of negative thoughts, the feelings decrease the human frequency by 10-12 MHz

In meditative positive thinking, prayer vibration increases by 10-12 MHz

The frequency of parasites, viruses, and others is a sub-frequency range.

4.3 | GENES

Genes control, but they are controlled.

Genes are much more than epigenetic

Not only feelings and experiences provoke epigenetic patterns in genes.

From the practice of Prof. Momchil Dobrev and Prof. Mariola Garibova it is proved that the thoughts of the

person himself, the thoughts of other people, loads from previous lives, loads created from the present life, loads from other people, energy influence

Experiences, lessons.

The membrane determines how the gene will be read.

The membrane is influenced by both the field and the field information.

Each field has relevant information about itself.

But not only that.

The energy field around the cell, the fractal energy field, determines how the gene will be read.

The external environment not only suppresses the gene, it adjusts it so that it remains the same for the rest of this life.

The energy field contains information. The really higher dimension of the energy field is the consciousness of the cell in question.

Regulation flows from the energy field of the cell itself and the whole organism.

Gene regulation is not determined by the gene itself.

Regulation is accomplished through separate lists for each gene.

- Regulatory sequences -

- Whether transcription factors will be associated with triggers and how they will activate genes depends on the energy field around the cell, around the body,

The brain is the organ that, based on the generation of thoughts, the corresponding thoughts give the appropriate signal. Cells are conscious. Consciousness includes all information about the past, functions, self - organization, life.

The evidence we apply below proves that the energy field of a parent influences the energy field of his child, and models from there his genes, and their regulation, which falls into harmony and coherence.

There is a coherence - at the energy level, at the field level, at the information level - at the level of consciousness of the respective energy field.

Each field and every dimension has an information field that can be called consciousness. This is information about the field, and its consistency with the entire universe.

Thoughts are frequency models that represent a corresponding field carrying relevant information.

Each higher dimension has a corresponding consciousness, which gives it access to all levels including the current level and other lower levels of dimension.

Each dimension represents and has its density and characterizes it.

Genes produce a group of substances that actually control what happens in the body. Proteins guide all major biochemical processes in body cells. As enzymes, they penetrate the bloodstream. They also penetrate the cell. As hormones and neurotransmitters, they transmit signals, respectively, not only from cell to cell but also to individual parts of the body.

The proteins were captured by receiving stations located on the outside of the cell. These receptors are also proteins.

The construction plan for the production of the corresponding protein is recorded in the gene - DNA sequence.

Protein control means not only setting a specific building plan for its production, but also how much it will take.

Genes can be read in different ways.

READING DIFFERENT WAYS OF GENES MAKES AND DEPENDS ON THE GENUS BREEDING, MUSCLE TURNING OR MISSING, AND ON THE FIELD CREATED ABOUT THE GENE.

THE FIELD STRUCTURE OF THE GENE gives instructions on how to read the gene - HOW.

Therefore, the number of proteins - over 30,000 exceeds the number of genes 20,000 - 25,000.

Depending on WHAT the DNA orb is wrapped in, how it is twisted, overturned depends on how it will be read.

IMPORTANT LAW - READING IS A SPIRAL - A RIGHT SPIRAL.

Sequence of nucleotide elements and their formation of triplets (codons) are arranged in DNA - Threads - or nucleotide sequences or DNA sequences.

5 | THEORY OF THE UNIEVRSUM

The theory of unievrsum , which in turn distinguishes:

- "energy-information genetics",
- "energy-information psychology"
- "energy-Information Psychiatry"

On the basis of the Cosmological Information Theory and Vortex Theory Theory, Mariola Garbova and Momchil Dobrev elaborate 2005. Theory of Univer-sum.

We will briefly state that, based on the research of the human energy system and how it affects precisely defined diseases such as the identification system and consequently as a method of therapy and healing, it has been proven that the chakras actually represent the human energy centers double swirls that can rotate both on one side and the other. The interdependence of man's energy is energetic in the environment at both the conscious and the subconscious level, he has demonstrated the connection of human states, diseases, diseases, to the state of man's energy system - chakras, energy flows, consciousness, subconscious.

In fact, diseases that have been studied by Mariola Garibova and Momchil Dobrev have found an easy and adequate explanation. This, in turn, not only provides an explanation for the types of illness, but also gives a realistic guide to their therapy holistically - ie. complex - physical and spiritual - ie. energy.

Based on these studies, the following sections of medicine, biology, psychology, genetics,

- "energy-information genetics",
- "energy-information psychology"
- "Energy-Information Psychiatry"

Since the current article allows for such a voluminous viewing of matter that requires a monograph of at least 1500-2000 pages, we will give the results briefly below.

6 | CONCLUSION

The above results show that only a complete and complementary energy study of human energy will give a clearer picture of its illnesses and provide better and more specific treatments and treatments. The human organism has to be holistically dissolved as an energy system that contains not only physics but also energy - soul.

These are the first steps in this direction. (1–4)
